of English and Hindi Hindi movie with english subtitles for your convenience (you can choose any language).. But don't assume that the book group on the way to reading isn't equally diverse. On the other hand, if it's as diverse as a room filled with writers I've always wanted to talk to, I think I have a right to insist that the writer who wants, at the very least, to be heard needs to speak out more aggressively and effectively than the one who has to write something in the allotted time that his friend will enjoy.

There is no such thing as a "new kid on the block." Those who start out with some great novel usually don't last a week or two, as you can see by the numbers. One must take their work seriously, and the author of that new book should know a little bit more about the novel and the writers of some other, lesser known work of the writer than he knows about himself. It may be an odd task to begin with, but one of the most important aspects of being published is that one has learned to accept that people aren't going to want to read what he wants to read, and that's fine.

One is tempted to ask, though, why I, as a journalist, would need to create this narrative; why I was so willing to let the authors speak to a book group of people who seem not to understand anything about their subject, yet who nonetheless know exactly what they're going for with the book (and presumably, what they want to leave for others?).
